VPI 9170 in Kuechensee.

1. In June 1951, Volkspolizei Dienststelle (VPI) 9170 in Kuechensee near Storkow was organized into a headquarters, an engineer company and the HVA orchestra and totaled about 350 police. It was commanded by VP Kommandeur Fraesdorf (fmu). Construction of bridges and field fortifications was practiced at the drill field on Grosser Krieschen Lake at the time of observation. Fifteen pontoons were seen with the unit which was armed with only small arms and light machine guns.
2. Upon the reorganization of the Volkspolizei, an engineer company of about 270 police remained in the installation in Kuechensee until April 1951. In early April, the two engineer companies totaling about 210 police which were stationed in Kirchmoos, were transferred to Kuechensee. However, these two companies were transferred to VPI 9190 in Fuenfeichen near Neubrandenburg in May.

VPI 9190 in Fuenfeichen.

3. Prior to late July 1951, VPI 9190 in Fuenfeichen near Neubrandenburg was organized into a headquarters, 1 signal Zug, 1 maintenance Zug, 1 supply Zug and 2 engineer companies and totaled about 200 police. The troops received no training at that time, but were engaged in construction work at the barracks installation in the area of the former concentration camp. The small arms of the unit were kept locked up. VP Oberrat Koeferl (fmu), an ex-sergeant, was the commanding officer of the unit, and VI Oberrat Bossenz, an ex-master sergeant, was IK officer.

VPI Engineer Training Camp at Krieschen Lake.

4. In June 1951, a VPI engineer tent camp was located on the premises of the former Hagen tractor plant on Krieschen Lake near Kuechensee, where the engineer Sonderabteilungen of all VPIs allegedly received training. Exercises with pontoons and bridge-building equipment were observed there. In mid-April, the engineer Sonderabteilung of the VPI in Cera was allegedly at the camp.
